1 Insights into the selective phase corrosion of as cast NiAl bronze alloy: Effect of electrical properties of each phase's protective film. Source: Journal of Alloys and Compounds. 2022. 01.SCI
2 Design of automatic pressurizing device of hydraulic support initial force. Source: Energy Science & Engineering. 2020. 08.SCI
3 Research on an Anchor Point Lever Beam Coupling Type Tuning Fork Micro-gyroscope. Source:International Journal of Precision Engineering and Manufacturing. 2020. 06.SCI
4 Investigation of microscopic residual stress and its effects on stress corrosion behavior of NiAl bronze alloy using in situ neutron diffraction/EBSD/tensile corrosion experiment. Source: Materials Characterization. 2020. 06.SCI
5 Research on Output Characteristics of Double-Ended Fixed Beam Piezoelectric Energy Harvester Under Random Excitation. Source:International Journal of Precision Engineering and Manufacturing. 2020.06.SCI
6 Design and Test of the MEMS Coupled Piezoelectric-Electromagnetic Energy Harvester. Source:International Journal of Precision Engineering

and Manufacturing. 2019.04.SCI

7 Structure Design and Test of MEMS Thermocouple Infrared Detector. Source: Microsystem Technologies.2018.05. SCI

8) The Research on Characteristics of Hydraulic Support Advancing Control System in Coal Mining Face. Source: Wireless Personal Communications. 2018.10. SCI

9 Improving Corrosion Resistance Properties of Nickel-Aluminum Bronze (NAB) Alloys via Shot Peening Treatment. Source: MATERIALS TRANSACTIONS.2019.07.SCI

10 Design and vibration sensitivity of a MEMS tuning fork gyroscope with anchored coupling mechanism. Source: Microsystem Technologies.2015.01. SCI

11 Design and analysis on a pressure control device to setting load for hydraulic support in coal face. Source: The Open Mechanical Engineering Journal. 2015.04. EI

12 Research on key technology for coal mining and mullock backfilling and gob-side entry retaining. Source: Acta Technica CSAV. 2016.08. EI
